### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

As stated in the previous office action:

Claim 1 includes the limitation that there is a spreader bar extending between the mounting arms such that the spreader bar is extendable for allowing the mounting arms to engage the different attachment points of the mounting brackets. Plourde (USPN 527375) teaches a trench paving device comprising a spreader bar to allow the tool to be adjustable to different sizes. While Plourde teaches a spreader bar, the reference fails to teach attachment points that would allow the mounting arms to attach to the housing in other places to accommodate buckets of different dimensions. Nor does Plourde teach a biased pin quick release connector comprising a support having a hole that extends from the arm, which also has a hole and wherein the holes are co-linear. The other references used all fail to teach or suggest a spreader bar. It would not have been obvious to combine references to achieve the claimed invention as stated in claim 1 and therefore the application is free from the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
